Questions about Trainings: (716) 858-7690

Naloxone is a benign drug. If it is administered when an individual is not experiencing an opioid overdose, no harm will come to the patient. In addition, the *Good Samaritan Law* protects an overdose victim and those who summon help:

- From arrest in the presence of misdemeanor drug possession and/or underage drinking
- From prosecution in felony possession (unless there are aggravating circumstances, e.g. possession with intent to sell or outstanding warrants)
